Abstract

Instructions for preparing manuscripts for AU-ICESDE2017 Proceedings are presented. They are intended to guide the authors in preparing camera-ready hardcopies and electronic forms of their manuscripts. Only manuscripts prepared according to these instructions will be accepted for the publication. The abstract must be single paragraph, single-line spacing, typed in Times New Roman 11 points. Abstract must be written in English within a maximum of 350 words and should summarize the content and conclusions of the paper. Length of the manuscript must be no longer than 8 pages. The instructions for full paper preparation and format template can be downloaded from the AU-ICESDE2017 website.

Keywords: List the keywords covered in your paper. These keywords will be used by the publisher to produce a keyword index. 3-5 words (Times New Roman, 11pt)

Introduction

This is the instruction for preparation of manuscripts for the 39th Grad Research Proceedings. Standard English or American spelling can be used but consistency should be maintained within a paper. The use of common or standard abbreviations is encouraged.

Contributed papers are limited to 8 pages including all figures, graphs and tables. The manuscript should appear in A4-size photocopy exactly the same as it is printed.

Contributed papers should generally be organized with the following items. Title (should be clear, descriptive and not too long), Authors' names (No academic position is required) together with their affiliations and fax and e-mail addresses (In the case of more than one author, please indicate to whom the presenter/ correspondence should be addressed) , Abstract, Keywords (normally 3-5 keywords not used in the title may be listed beneath the abstract to assist searching techniques) , Introduction, Materials and Methods, Results and Discussion (Tables and/ or Figures) , Conclusions, Acknowledgments (if preferred), and References.

Materials and Methods

Check list of full paper

Full paper must be written in English. Check that all references mentioned in the text are in the References. List references in the text by square brackets. The list of references should be given in numerical order at the very end of your manuscripts under the heading 'References' as the last part of this sample manuscript.

Check the symbols in figures are legible at the size likely to be used in the published article. Tables should be self-explanatory. Indicate approximate positions of figures and tables on the manuscript. Check that figures and tables are numbered in the order in which they are discussed in the text.

Paper size

Please use an A4 paper (21.0 cm x 29.7 cm) and a 2-column format. The space between lines is single-space. No space is needed between subsection headings. Length of the manuscript must be no longer than 8 pages.

Font type and sizes

Only **Times New Roman** font is accepted in manuscript. Main headings (Introduction, Materials and Methods, Results and Discussion, Conclusions, Acknowledgments, References) are set in bold roman (11 points) type at the center of a column. Minor headings are set in bold roman (10 points). A regular 10 point size must be used throughout the context.

Start a new paragraph by indenting it from the left margin by 7 mm (and not by inserting a blank line)

Equations and chemical formulae

Equations should be numbered serially at the right-hand side in parentheses. In general, only equations explicitly referred to in the text need being numbered. Leave a blank line before and after an equation.

$$|V\rangle_{ij} = \frac{1}{\sqrt{2}} \left(|\uparrow\rangle_i |\downarrow\rangle_j - |\downarrow\rangle_i |\uparrow\rangle_j \right) \quad (1)$$

Chemical formulae should be typewritten, if possible. Subscripts and superscripts should be clear. Take special care to show clearly the difference between zero (0) and the letter O, and between one (1) and the letter l. For simple fractions use the solidus (/) instead of a horizontal line.

Results and Discussion

Tables

Paste tables where needed (after and as close as possible to where they are mentioned in the text). Tables should be numbered according to their sequence in the text using Arabic numbers (e.g. Table 1, Table 2) and provide a caption for each table. Place caption above the table. Vertical lines should not be used to separate columns. Leave some extra space between the columns instead. Any explanation essential to the understanding of the table should be given as a footnote at the bottom of the table. Font sizes and styles to be used in the manuscript are summarized in Table 1.

Table 1: Font Sizes and Styles

Item	Font Size	Font Style
Title	14	Bold, Capitals
Author's names	12	Regular
Affiliations, addresses, e-mail addresses	11	Italic
Abstract	11	Regular
Section Headings	11	Bold, Center
Body Text	10	Regular
References	10	Regular

Figures

Paste figures where needed (after and as close as possible to where they are mentioned in the text), if necessary spanning both columns. Number them consecutively using Arabic numbers (e.g. Figure 1, Figure 2) and provide a caption for each figure.

Place caption beneath the figure. Leave one blank line before, and one after the caption. Do not indent or center the caption. Only black and white illustrations or graphics are acceptable. Photographs should be submitted and scanned as high quality photos. Do not submit poor-quality photocopies. If you use half tone (gray-scale) illustrations please keep in mind that there will be some loss in quality due to reproduction.

Conclusions

The manuscript should be checked by all the co-authors prior to the submission, if possible, to eliminate error(s) that may escape your review. All submissions to 23rd Grad Research proceedings should proceed online before the deadline (September 30, 2011) at the conference web site (<http://www.sci.rmuti.ac.th/grad23/>).

Acknowledgments

In acknowledgement you may thank all the people/organizations who provided their assistance to you in forms of advice, suggestions, and any others.
